¹Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 9. Data were not imputed for the outlying areas.

Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

¹Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response

rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

¹The average per stationary outlet was calculated by dividing the total number of public-use Internet computers in central and branch outlets by the total number of such outlets. See Table 3 for number of service outlets.

²Per 5,000 population and per capita are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

³Response rate is the percentage of libraries that reported the item. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

²Per capita and per 1,000 population are based on the total unduplicated population of legal service areas. The determination of the unduplicated figure is the responsibility of the state library agency and should be based on the most recent state population figures for jurisdictions in the state.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

¹The average was calculated by dividing the total number of materials of each type by the total number of public libraries.

²Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

³Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.

¹The average was calculated by dividing the total number of materials of each type by the total number of public libraries.

²Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. The response rates are included in Table 17. Data were not imputed for the outlying areas.

Data users who create their own estimates using data from this report should cite the Institute of Museum and Library Services as the source of the original data only. Although the data in this table come from a census of all public libraries and are not subject to sampling error, the census results may contain nonsampling error. Additional information on nonsampling error, response rates, and definitions may be found in Appendix B of the report for the Public Libraries Survey.

³Response rate is calculated as the number of libraries that reported the item, divided by the total number of libraries in the survey frame. For item(s) with response rates below 100 percent, data for nonrespondents were imputed and are included in the table. Data were not imputed for the outlying areas.

⁴Total includes the 50 states and the District of Columbia but excludes outlying areas and libraries that do not meet the FSCS Public Library Definition.

NOTE: Detail may not sum to totals because of rounding. Data were not reported by the following outlying areas (American Samoa, Northern Marianas, and Virgin Islands). Missing data were not imputed for nonresponding outlying areas.
