Commissioner

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Highlights

Number of Public Libraries and Their Service Outlets and Legal Basis

- There were 8,981 public libraries (administrative entities) in the 50 states and the District of Columbia in 1995 (table 1).¹
- About 11 percent of the public libraries served nearly 71 percent of the population of legally served areas in the United States (derived from tables 1A and 1B).² Each of these public libraries had a legal service area population of 50,000 or more (table 1B).
- A total of 1,466 public libraries (over 16 percent) had one or more branch library outlets, with a total of 7,057. The total number of central library outlets was 8,937. The total number of stationary outlets (central library outlets and branch library outlets) was 15,994. Nine percent of public libraries had one or more bookmobile outlets, with a total of 978 bookmobiles (table 2).
- Fifty-four percent of public libraries were part of a municipal government; nearly 12 percent were part of a county/parish; nearly 6 percent had multijurisdictional legal basis under an intergovernmental agreement; almost 11 percent were non-profit association or agency libraries; over 3 percent were part of a school district; and nearly 8 percent were separate government units known as library districts. About 1 percent were combinations of academic/public libraries or school/public libraries. Over 5 percent reported their legal basis as “other” (table 17).
- Eighty and one-half percent of public libraries had a single direct service outlet, (that is, an outlet that provides service directly to the public) (table 18).

Income, Expenditures, and Staffing

- Over 78 percent of public libraries’ total operating income of about \$5.6 billion came from local sources, 12 percent from the state, 1 percent from federal sources, and almost 9 percent from other sources, such as gifts and donations, service fees and fines (table 10).
- Per capita operating income from local sources was under \$3 for over 12 percent of public libraries, \$3 to \$14.99 for over 50 percent, and \$15 to \$29.99 for nearly 26 percent of public libraries.³ Per capita income from local sources was \$30.00 or more for nearly 12 percent of libraries (table 11).
- Total operating expenditures for public libraries were over \$5.2 billion in 1995. Of this, nearly 65 percent was expended for paid staff and over 15 percent for the library collection (table 12). The average U.S. per capita operating expenditure for public libraries was \$20.88. The highest average per capita operating expenditure in the 50 states was \$36.96 and the lowest was \$8.86 (table 13).
- Over 39 percent of public libraries had operating expenditures of less than \$50,000 in 1995; over

¹See glossary in Appendix B for the definition of the terms used in this report.

²The percent distribution was derived from tables 1A and 1B. The sum of the five columns on table 1A where the population of the legal service area is greater than 49,999 is 10.9. The sum of the five columns on table 1B where the population of the legal service area is greater than 49,999 is 70.8 percent.

³Per capita figures are based on the total unduplicated population of legal service areas in the states, not on the total population of the states.

38 percent expended between \$50,000 and \$399,999; and over 22 percent expended \$400,000 or more (table 14).

Staffing and Collections

- Public libraries had a total of 115,968 paid full-time equivalent (FTE) staff (table 8).
- Nationwide, public libraries had over 695 million books and serial volumes in their collections or 2.8 volumes per capita. By state, the number of volumes per capita ranged from 1.6 to 5 (table 6).
- Nationwide, public libraries had collections of nearly 24.5 million audio materials and over 11 million video materials (table 6).

Circulation and Interlibrary Loans

- Total nationwide circulation of public library materials was about 1.6 billion or 6.4 per capita. Highest statewide circulation per capita in the fifty states was 12.0 and lowest was 3.0 (table 4).
- Nationwide, about 8.8 million library materials were loaned by public libraries to other libraries (table 4).

Children's Services

- Nationwide circulation of children's materials was nearly 560 million or nearly 35 percent of total circulation. Attendance at children's programs was almost 41 million (table 5).

Acknowledgments

The collection and publication of a census of this magnitude has been a team effort. It would not have been accomplished without the support of the following individuals and organizations: the local public librarians who provided the data; the Federal-State Cooperative System (FSCS) State Data Coordinators; the Chief Officers of State Library Agencies (COSLA); the American Library Association (ALA); the National Commission on Libraries and Information Science (NCLIS); and The Institute of Museum and Library Services.

Thanks to the FSCS Steering Committee members who led the effort during the time frame these data were collected and processed.

Diane Carty, Massachusetts Board of Library Commissioners
Denise Davis, Maryland State Department of Education
Gretchen Fairbanks, State Library of Louisiana
Diane Gunderson, Montana State Library
Keith Curry Lance, Colorado State Library
Libby Law, South Carolina State Library
Sandi Long, Utah State Library
Gerry Rowland, State Library of Iowa
Mark Smith, Texas Library Association
Diana Ray Tope, FSCS Chair, Georgia Department of Education
Lawrence Webster, State Library of Florida
Joseph F. Shubert, Chief Officer, Emeritus, New York State Library
Tom Sloan, COSLA Representative, Delaware Division of Libraries
E. Walter Terrie, deceased

Mary Jo Lynch, American Library Association

Appendix D: State Ranking Tables	121

Introduction

The tables in this E.D. TABS summarize information about public libraries in the 50 states and the District of Columbia for state fiscal year 1995. However, some public libraries in two states (Maine and Michigan) reported public library data for a fiscal year that included 1993. These data were collected through the eighth Public Libraries Survey (PLS). The survey is conducted annually by the National Center for Education Statistics (NCES) through the Federal-State Cooperative System (FSCS) for public library data.

This E.D. TABS includes information about service measures such as reference transactions, public service hours, interlibrary loans, circulation, library visits, children's program attendance, and circulation of children's materials. It also includes information about size of collection, staffing, operating income and expenditures, type of legal basis, and type of administrative structure. *For the first time, the data in this E.D. TABS include imputed data for nonresponding libraries.* More detail on the methodology used for imputation is provided in the Technical Notes section of this publication. For public library service outlets, summary information is provided about the number and type of outlets. *For the first time, state ranking tables of selected data are included in Appendix D.*

FSCS is a cooperative system through which states and the outlying areas submit individual public library data to NCES on a voluntary basis. At the state level, FSCS is administered by State Data Coordinators (SDCs), each one appointed by the Chief Officer of the State Library Agency. The SDC collects the requested data from public libraries and submits these data to NCES. NCES aggregates the data to provide the state and national totals presented in this E.D. TABS. In the 1995 submission year, all 50 states and the District of Columbia submitted data. In fiscal year 1995, requests for data were sent to the following outlying areas: Commonwealth of the Northern Marianas Islands, Guam, Puerto Rico, Republic of Palau, and U.S. Virgin Islands. Library data from the outlying areas are not included in the E.D. TABS. NCES is working with the outlying areas and hopes to be able to include their data in future years. Appendix A provides additional detail on the history of and future plans for the Public Libraries Survey.

There are 39 tables in this E.D. TABS. Table 1 has 3 parts (tables 1, 1A, and 1B); tables 2 through 19 are in sets of 2 each. The base table in each set displays data for the nation as a whole and for each of the 50 states and the District of Columbia. The A table in each set displays the same data by 11 ranges of size of the population of legal service areas.

Items collected but not reported in this E.D. TAB:

- **New Items.** Six new Electronic Technology data items were collected for the first time on the fiscal year 1995 PLS. They are:

- Operating Expenditures for Library Materials in Electronic Format
- Operating Expenditures for Electronic Access
- Number of Library Materials in Electronic Format
- Access to Electronic Services
- Access to Internet
- Internet Use Code

A question: Does this public library meet all the criteria of the FSCS public library definition? was also added as a data item to the FY 95 Public Library Survey.

These seven data items were collected for the first time in fiscal year 1995. In accordance with FSCS Steering Committee policy, new data items are not published until the second year they are collected.

Although these items are not included in the tables for E.D. TABS, they will be reported on the Public Libraries Survey file released on Internet and on diskette.

- **Data about Public Library Service Outlets.** The following items were collected in fiscal years 1993 and 1994, but they are not reported in this E.D. TABS: estimated range of population of legal service area by public library service outlet, the location of public library service outlets relative to a metropolitan area, number of books-by-mail only outlets, number of bookmobiles by bookmobile outlet, and state library agencies and their outlets.
- **Identifying Information about Individual Public Libraries and their Outlets.** As in the past, identifying and descriptive data were collected for each public library. Identifying information was also collected for each public library service outlet, the state library agencies, and some systems, federations, and cooperative services. Although these items and the data about public library service outlets noted above are not included in this E.D. TABS, they will be reported on the Public Libraries Survey file released on Internet and on diskette.

Terminology Used to Describe the Structures and Relationships Among and Within Public Libraries

This survey collects identifying information for and/or data about administrative entities and public library service outlets. The structure among public libraries and their outlets is described below.

- **Administrative entities.** An administrative entity is the public library, state library agency, system, federation, or cooperative service that is legally established under local or state law to provide public library service to a particular client group. The administrative entity may be administrative only and have no public library service outlets, it may have a single outlet, or it may have more than one public library service outlet. The types of administrative structures for public libraries are reported in table 18.

Types of Administrative Entities

- **Public libraries.** In this E.D. TABS, the term “public library” means an administrative entity. Public libraries are one of the three types of administrative entities, and the focus of this E.D. TABS. See Appendix B for the definition of a public library.
- **State library agencies.** State library agencies are one of the three types of administrative entities. A state library agency is the agency within each of the states and outlying areas authorized to develop library services in the state or territory. It may also provide direct services to the public. Some state library agencies also have service outlets. Data for state library agencies and their outlets are not included in the tables.
- **System, federation, or cooperative services.** A system, federation, or cooperative service is an autonomous library joined by formal or informal agreement(s) with other autonomous libraries to perform various services cooperatively, such as resource sharing and communications. Under the Public Libraries Survey, a public library may have the word “system” in its legal name but does not identify itself as a headquarters of or as a member of a system, federation or cooperative service, unless it has an agreement with another autonomous library. These agreements can be with other public libraries or with other types of libraries, such as school or academic libraries. Data for library systems, federation, or cooperative services are not collected by the Public Libraries Survey. However, a survey item called Interlibrary Relationship Code collects data on each public library’s system status (see table 19).

Public Library Service Outlets

- **Public library service outlets.** Public libraries can have one or more outlets that provide direct public library service. The three types of public library service outlets reported in this E.D. TABS are central library outlets, branch library outlets, and bookmobile outlets. A fourth type, books-by-mail only outlets, was collected but not reported in this E.D. TABS. See Appendix B for definitions of these terms. Table 2 reports data concerning public library service outlets.

Technical Notes

Survey Universe

The respondents for this E.D. TABS were the 8,981 public libraries identified in the 50 states and the District of Columbia by state library agencies. Although data were not systematically collected from public libraries on Native American reservations, Native American Tribal Government was added as a reporting category for type of local government structure, beginning with the FY 1993 survey. A total of 18 public libraries were reported in this category in FY 95. Data were not collected from military libraries that provide public library services or from libraries that serve the residents of institutions.

Survey Response

Unit response. A total of 8,763 of the 8,981 public libraries responded to the Public Libraries Survey, for a unit response rate of 97.6 percent. Respondents to the survey are defined as public library administrative entities for which population of the legal service area was reported (an item provided by the state data coordinator) and which responded to at least three of the five following survey items: total paid employees, total income, total operating expenditures, book/serial volumes, and total circulation.

Item response. NCES statistical standards specify that items with a response rate of less than 70 percent should not be used in analysis. For national totals, item response rates did not fall below 70 percent for any items in this report. For state totals, response rates fell below 70 percent in 13 states for a few items in this report (library visits, reference transactions, circulation of children's materials, and children's program attendance). These data have been suppressed from the tables (replaced with "(S)"). In some cases, one or more states did not collect any data on an item (i.e., the state was a total nonrespondent to the item). A single dash was used in the tables to identify data items with a 0 percent response rate. These data should be used with caution, as discussed below. Item response rates are included in the tables in this report. Items with response rates below 100 percent include imputations for nonresponse.

Percentages Reported on Tables

Percentages rather than raw numbers are used in many of the table distributions in order to provide a clearer perspective on the patterns in these data. Note: To obtain a desired value on a percentage distribution table (e.g., table 10), multiply the percentage for the item by the total associated with the item (the total may be on a different table) and divide by 100. Percentage distributions may not sum to 100 due to rounding.

Paid Staff (Full-Time Equivalent)

Data on paid staff were reported in (full-time equivalents) (tables 8 through 9A). To ensure comparable data, 40 hours was set as the measure of full-time employment, and a methodology for calculating full-time equivalents (FTE's) was provided to respondents. Respondents were instructed to compute full-time equivalents of part-time employees as the total number of hours worked per week by part-time employees in each category divided by the 40-hour measure of FTE (e.g., 60 hours per week of part-time work divided by the 40-hour measure equals 1.50 FTE). Data were reported to two decimal places.

Data Collection and Use of Technology

The Public Libraries Survey, FY 1995 was mailed to the states in late May 1996 and had a due date of July 31, 1996. The last state submission was received in mid-March, 1997. States reported their data using a personal computer software provided by NCES known as DECPLUS (Data Entry Conversion, Public Library Universe System). DECPLUS permits direct data entry or the import of data from machine-readable files (e.g., Lotus 1-2-3, dBASE, or ASCII). Data reported on this survey are usually only part of the data most states collect from their local public libraries. Most states collect data from their public libraries using paper forms, rather than electronically.

Editing

State level. The DECPLUS software has an edit program that generates on-screen error warnings during the data entry/import process, enabling the respondent to review their data and correct many errors immediately. Following data entry/import, the respondent can generate an on-screen or printed error report of data falling outside established limits, for additional review and possible revision of their data before submission of the final the final file to NCES. Four types of edit checks were performed:

1. Relational edit checks. A data consistency check between related data elements. For example, an error message is generated if the number of ALA-MLS Librarians is greater than Total Librarians.
2. Out-of-range edit checks. A comparison of data reported for an item to the "acceptable range" of values. Performed on current-year and historical (current-year vs. past-year) data. For example, an error message is generated if average Public Service Hours per outlet per week is less than 10, or if Total Circulation reported this year is not within $\pm 5,000$ or $+25\%$ to -10% of last year's value for Total Circulation.
3. Arithmetic edit checks. An arithmetical accuracy check of a reported total and its parts to the generated total. For example, an error message is generated if Total Operating Income is not equal to the sum of its parts (Local Government Income, State Government Income, Federal Government Income, and Other Income).
4. Blank/zero/invalid edit checks. A check of reported data against acceptable values. For example, an error message is generated if Book/Serial Volumes is 0 or blank.

Respondents also used DECPLUS to generate state summary tables of their data, corresponding to the tables in this report, and single-library tables, showing data for individual public libraries. States were encouraged to review the tables for data quality problems before submitting their final data to NCES. States submitted their final data with a signed form from the Chief Officer of the State Library Agency, certifying the accuracy of their data.

National level. NCES and the U. S. Bureau of the Census (the data collection agent for the survey) reviewed and edited the data, working directly with State Data Coordinators and the FSCS Steering Committee. Data submissions were reviewed upon receipt for completeness, and states were immediately contacted to resolve any problems such as missing files. Nonresponse follow-up was conducted shortly after the survey due date. After data were received from all 50 states and the District of Columbia, the preliminary data file, E.D. TABS tables, and edit reports were reviewed by NCES, Census, and the FSCS Steering Committee for questionable data. The findings were mailed to the States in April 1997, along with a copy of their state data in the E.D. TABS format. The States reviewed these findings and submitted revised data (if appropriate). The last data correction was submitted in May 1997.

Imputation

The FY 95 Public Libraries Survey data file is the first public library data file to include imputations for nonresponding libraries. The imputation methodology was developed for NCES by the Census Bureau. Annual public service hours were not imputed, due to an oversight, and will be imputed in FY 96. The survey items on electronic technology, added in FY 95, will not be imputed until the data are more fully reported and considered of good quality.

The following strategies were used to impute data for libraries that did not respond in 1995:

- A. For libraries that responded in 1994 but not 1995 (or in 1993 but not in 1994 or 1995):
 1. All libraries, including nonresponding libraries, were sorted into imputation cells based on the region and size of population served.

2. Average changes in values of data were calculated for institutions that had reported in both 1994 and 1995 (or in both 1993 and 1994).
3. The average changes computed in step 2 were applied to the 1994 data (or to the 1993 data) of 1995 nonrespondent libraries to obtain an estimate for 1995.

This method was used for imputing audio, bookmobiles, book/serial volumes, branches, centrals, librarians, ALA-MLS librarians, other operating expenditures, reference transactions, salaries, subscriptions, total circulation, total staff expenditures, total collection expenditures, total paid employees, total operating expenditures, and library visits.

4. Employee benefits were derived by subtracting salaries from the estimated total staff expenditures determined in step 3.
5. Total operating expenditures were derived by summing total collection expenditures, total staff expenditures, and other operating expenditures estimated in step 3.
6. For income variables (total income and income from federal, state, and local government sources), both responding and nonresponding libraries in an imputation cell were arranged in decreasing order of size of population served. A growth rate was determined by calculating the growth of the next smallest library to the nonresponding library that had data for both 1994 and 1995 (or 1993 and 1994). This growth rate was applied to the nonresponding library's 1994 (or 1993) data. If no data were available in 1994 for the next smallest library, the growth rate was assumed to be 1.00.
7. Other income was derived by subtracting income from federal, state, and local sources from total income.
8. Children's program attendance was estimated by multiplying the current-year total library visits by the prior-year ratio of children's program attendance to total library visits.
9. Children's circulation was estimated by multiplying the current-year total circulation by the prior-year ratio of children's circulation to total circulation.

B. For libraries with no data in 1993, 1994 or 1995:

1. The mean of the imputation cell was calculated for all libraries that responded in 1995. The cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

This method was used for imputing audio, bookmobiles, book/serial volumes, branches, centrals, librarians, ALA-MLS librarians, other operating expenditures, reference transactions, salaries, subscriptions, total circulation, total staff expenditures, total collection expenditures, total paid employees, operating expenditures, library visits, total income, and income from federal, state, and local sources.

2. To impute total library visits, library visits was summed over all responding libraries in an imputation cell, as was the population served. The ratio of total library visits to total population served was multiplied by the nonrespondent's population value to estimate the nonrespondent's library visits.
3. Children's program attendance was estimated using the method described in step 2 where the ratio of total children's program attendance to total library visits for the responding libraries in an imputation cell was multiplied by the nonrespondent's current-year library visits.
4. Children's circulation was estimated by calculating the ratio of children's circulation to total circulation for the responding libraries in an imputation cell and multiplying the ratio by the current-year total

circulation of the nonresponding library.

5. Employee benefits were derived by subtracting salaries from the estimated total staff expenditures determined in step 1.
6. Total operating expenditures were derived by summing total collection expenditures, total staff expenditures, and other operating expenditures estimated in step 1.

C. For all non-responding libraries:

1. Capital outlay was derived by imputing total expenditures (a derived variable which is the sum of total collections expenditures, total staff expenditures, other operating expenditures, and capital outlay) and subtracting total operating expenditures in order to get capital outlay. If the derived capital outlay had a negative value, it was changed to zero, total operating expenditures were changed to equal total expenditures, and total collection expenditures, total staff expenditures, and other operating expenditures were raked to total operating expenditures.
2. The mean of the imputation cell was used to estimate videos and interlibrary loans. The cell mean was adjusted for the size of a nonresponding library by multiplying it by the ratio of the nonrespondent's total population served to the mean size of population served for all responding libraries.

Caveats for Using These Data

Using the Data to Make Comparisons

As indicated, the FY 95 file, and this E.D. TABS, includes imputations for nonrespondents. In prior years, the data were based on responding libraries only, and the percentage of public libraries responding to a given item varied across state, ranging from 0 to 100 percent. Therefore, caution should be used in comparing FY 95 data to prior-year data. Work is in progress to impute data for FY 91 to FY 94.

Because of state differences in reporting periods (see table below) and definitions, comparisons of data between states should be made with caution. While not a state, the District of Columbia is included in this report. Special care should be used in comparing data for a city with data for a state. Caution should also be used in making comparisons with data from the state of Hawaii. Hawaii reports only one public library for the state.

Reporting Period

One methodological issue in using these data is the time period covered by the data. The FY 1995 Public Libraries Survey requested data for state fiscal year 1995. In some states, the fiscal year reporting period varies among localities. In such cases, the state was requested to report the earliest starting date and latest ending date reported to them by their public libraries. Therefore, the reporting period for some states spans more than a 12-month period. However, in these states, each public library provided data for a 12-month period. Collectively, the FY 1995 data spanned the time period from January 1993 to December 1995. A total of 10 different reporting periods were used by states for the FY 1995 data (see table below).

States by Reporting Period

07/94 to 06/95		01/95 to 12/95		Other
AK	MT	AR		01/93 to 11/95: ME
AZ	NC	CO		11/93 to 09/95: MI
CA	NM	IN		01/94 to 06/95: PA

MA	WV	SD		
MD	WY	WA		
		WI		

Definitions

The Public Libraries Survey, FY 1995 collected information on 51 data items for each public library, including 40 basic data items and 11 library identification items. The survey collected 12 data items for each public library service outlet. In addition, four data items were collected directly from each state library on state characteristics of the data submission.⁴ The Public Libraries Survey definitions for these data elements are shown in Appendix B. The definitions actually used by some states in collecting data from their public libraries,

⁴These items were the reporting period starting date and ending date, the official state population estimate, and the total unduplicated population of legal services areas.

however, may not be consistent with Public Libraries Survey definitions. The NCES *Report on Coverage Evaluation in the Public Library Statistics Program* (NCES 94-430) and their *Report on Evaluation of Definitions Used in the Public Library Statistics Program* (NCES 95-430) address issues of consistency of definitions among states.

Public library. The Public Libraries Survey used the following definition of a public library: “A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region and that provides at least the following: 1) an organized collection of printed or other library materials, or a combination thereof; 2) paid staff; 3) an established schedule in which services of the staff are available to the public; 4) the facilities necessary to support such a collection, staff, and schedule; and 5) is supported in whole or in part with public funds.”

Library visits and reference transactions. Public libraries provided annual counts for library visits and reference transactions if they were available. Otherwise, annual estimates were provided, based on a count taken during a typical week in October, multiplied by 52. Thus, the values reported for library visits and reference transactions may represent actual tallies or they may be estimates. For more information see Appendix B.

Population of Legal Service Area

There are significant methodological differences in the ways states calculate their population of legal service areas and their total unduplicated population of legal service areas. The time periods for which these population counts are made also vary.

Another methodological issue is that the calculated total for “Population of Legal Service Areas” of public libraries in a state may, in some cases, exceed the state’s actual population or the state’s total unduplicated population of legal service areas. This is because adjacent public libraries may count the same population. For example, a county library and a city library within the county may both receive income from the same city, so both may serve and count the same population.

If a state’s calculated total for “Population of Legal Service Areas” exceeds either their state population or their “Total Unduplicated Population of Legal Service Areas”, the state has “overlapping” service areas. A total of 28 states reported overlapping service areas (see Appendix C for a list of these states). Although West Virginia’s total population of legal service area exceeds the total unduplicated population of legal service areas, the state does not have overlapping service areas. The state reports the population of legal service area for Old Charles Town Library but excludes the population from its total unduplicated population because the library does not receive state aid. The remaining states and the District of Columbia provided the same figure for “Unduplicated Population of Legal Service Areas” as they provided for “Population of Legal Service Area”.

In order to do meaningful analysis of data involving population of legal service areas, such as total circulation per capita in a state or the nation, the population of legal service areas data in states with overlapping service areas were adjusted to eliminate such duplicative reporting. To accomplish this, each state library agency provided a single, state-level figure for “Total Unduplicated Population of Legal Service Areas”. The unduplicated population data provided by the states may vary from that provided by sources that use standard methodology (e.g., U.S. Bureau of the Census). The populations of unserved areas were not included in this figure.

An adjusted (unduplicated) population of legal service area was then derived for each public library in a state. This was done by forming the ratio of the public library’s reported “Population of Legal Service Area” to the state’s calculated total for “Population of Legal Service Areas” and applying the ratio to the state’s “Total Unduplicated Population of Legal Service Areas”. Table 1 provides the reported “Population of Legal Service Areas” for each state and the “Total Unduplicated Population of Legal Service Areas” for each state which was used to adjust the reported population of legal service areas in the state. In the other tables, the data involving population of legal service areas (such as library visits per capita, or serial subscriptions per 1,000) are based on the adjusted population of legal service areas, not the reported population of legal service areas.

Ordering Machine-Readable Data and Publications

Under its six library surveys, NCES regularly publishes E.D. TABS which consist of tables, usually presenting state and national totals, a survey description, and data highlights. NCES also publishes separate, more in-depth studies analyzing these data. Many of these publications are available in printed format and over the Internet. Edited raw data from the library surveys are made available on data diskettes, and also over the Internet.

New Hampshire	229	1,246	100.0	1,124					

Notes:

- A state's total population of legal service area may be more than its total population because, in some states, some public libraries have overlapping service areas.
- Response rate is the percentage of libraries for which a nonzero value for population of legal service area was reported. Item(s) with response rates below 100 percent include imputations for nonresponse.
- In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

See notes at end of table.

Table 1A.--Percentage distribution of public libraries, by population of legal service area, and by state: Fiscal year 1995

Wyoming	23	20	3	74	23	100.0	51	100.0	3	100.0

- Notes:
- Response rate is the percentage of libraries that reported the specific item. Items with response rates below 100 percent include imputations for nonresponse.
 - Total stationary outlets is the sum of central and branch libraries.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.
 - Of the 8,981 libraries, 7,231 have single outlets; 1,743 have multiple outlets, and 7 reported 0 (zero) outlets. Some single-outlet libraries are bookmobiles. Some multiple-outlet libraries consist of centrals only, branches only, bookmobiles only, or branches and bookmobiles.

- Notes:
- Percentage distribution is based on libraries that reported public service hours. Percentages may not sum to 100 due to rounding.
 - Response rate is the percentage of libraries that reported public service hours. The data on public service hours were not imputed for nonresponse.
 - The formula ((Total annual public service hours/52) / Number of outlets per public library) was applied to convert the reported total annual public service hours to weekly public service hours per outlet.
 - Outlets include central/main, branches, and bookmobiles.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

- Notes:
- Percentage distribution is based on libraries for which public service hours and a nonzero value for population of legal service area were reported. Percentages may not sum to 100 due to rounding.
 - The response rate for this table (97.7) is the percentage of libraries for which public service hours and a nonzero value for population of legal service area were reported. The data on public service hours were not imputed for nonresponse.
 - The formula ((Total annual public service hours/52) / Number of outlets per public library) was applied to convert the reported total annual public service hours to weekly public service hours per outlet.
 - Outlets include central/main, branches, and bookmobiles.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

- Notes:
- Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse.
 - Per capita and per 1,000 population are based on population of legal service area.
 - When a Total is less than 500 the value is rounded to 0. This value does not represent a true zero.
 - "-" Total nonresponse to data item.
 - "(S)" Data are suppressed per NCES statistical standard (item response rate less than 70 percent).
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Notes: • Response rate is the percentage of libraries for which the specific item and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse.

• Per capita and per 1,000 population are based on population of legal service area.

• In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

Table 6A.--Number of public library materials and number of library materials per capita or per 1,000 population, by type of material, and by population of legal service area: 50 states and the District of Columbia, fiscal year 1995

- Notes:
- Response rate is the percentage of libraries that reported the specific item. Items with response rates below 100 percent include imputations for nonresponse.
 - The Librarians with ALA-MLS, Total column is also reported as part of the Librarians, Total column.
 - ALA-MLS: A master's degree from a graduate library education program accredited by the American Library Association (ALA).
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

Wisconsin	381	119,082,698	0.6	3.9	90.5	5.0	100.0
Wyoming	23	11,848,222	0.4	0.4	88.3	11.0	100.0

- Notes:
- Percentages may not sum to 100 due to rounding.
 - Response rate is the percentage of libraries that reported total income and/or all four sources of income. Items with response rates below 100 percent include imputations for nonresponse.
 - Some federal funds, including Library Services and Construction Act (LSCA) funds, are distributed through state library agencies to public libraries and appear in the table under federal income. Other federal funds are used to provide services that benefit local public libraries through the state library agency or through library cooperatives. These funds are not included in the table because they are not received as income by public libraries.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

Table 10A.--Total public library operating income and percentage distribution of public library operating income, by source of income, and by population of legal service area: 50 states and the District of Columbia, fiscal year 1995

Population of legal service area	Number of public libraries	Source of income				
		Total	Federal	State	Local	Other
		----- Percentage distribution -----

1,000 to 2,499	1,644	49,924,443	1.9	5.8	68.2	24.1
Less than 1,000	993	13,655,381	2.0	7.1	67.2	23.8

- Notes:
- Percentages may not sum to 100 due to rounding.
 - The response rate for this table (97.5) is the percentage of libraries for which total operating income and/or all four sources of income and a nonzero value for population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse.
 - Some federal funds, including Library Services and Construction Act (LSCA) funds, are distributed through state library agencies to public libraries and appear in the table under federal income. Other federal funds are used to provide services that benefit local public libraries through the state library agency or through library cooperatives. These funds are not included in the table because they are not received as income by public libraries.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Wyoming	23	10,865,071	68.5	14.4	17.0	100.0

- Notes:
- Percentages may not sum to 100 due to rounding.
 - Response rate is the percentage of libraries that reported total expenditures and/or all three types of expenditures. Items with response rates below 100 percent include imputations for nonresponse.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

Table 12A.--Total public library operating expenditures and percentage distribution of expenditures, by type of expenditure, and by population of legal service area: 50 states and the District of Columbia, fiscal year 1995

Population of legal service area	Number of public libraries	Type of expenditure			
		Total	Staff	Collection	Other
----- Percentage distribution -----					
Total	8,981	\$5,226,215,759	64.9	15.1	20.0

2,500 to 4,999	1,339	79,577,168	58.9	18.9	22.2
1,000 to 2,499	1,644	45,214,074	54.1	21.0	24.9
Less than 1,000	993	12,229,554	50.6	22.8	26.6

- Notes:
- Percentages may not sum to 100 due to rounding.
 - The response rate for this table (97.4) is the percentage of libraries for which total expenditures and/or all three types of expenditures and a nonzero value for total population of legal service area were reported. Items with response rates below 100 percent include imputations for nonresponse.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

- Notes:
- Percentages may not sum to 100 due to rounding.
 - Response rate is the percentage of libraries that reported type of legal basis (the type of local government structure within which the library functions). Item(s) with response rates below 100 percent include imputations for nonresponse.
 - Multijurisdictional means that the public library is operated jointly by two or more units of local government under an intergovernmental agreement.
 - Association libraries means that the public library is privately controlled but meets the statutory definition of a public library in a given state.
 - School district means that the public library is under the legal basis of a school district.
 - Library district means a district, authority, board or commission authorized by state law to provide library services.
 - Combined means that the public library's legal basis can be by a combination of school/public libraries or academic/public libraries.
 - In five states (Maine, Michigan, Pennsylvania, Texas, and Vermont), some public libraries reported data for fiscal year 1993 or 1994.

Source: U.S. Department of Education, National Center for Education Statistics, Federal-State Cooperative System for Public Library Data (FSCS), Public Libraries Survey, Fiscal Year 1995.

Table 17A.--Percentage distribution of public libraries, by type of legal basis, and by population of legal service area: 50 states and the District of Columbia, fiscal year 1995

Appendixes

Appendix A

Background of the Federal-State Cooperative System (FSCS) for Public Library Data

In 1985, a pilot project to standardize the collection of public library data by State Library Agencies in 15 of 50 states and the District of Columbia, was developed cooperatively by the National Center for Education Statistics (NCES) and the American Library Association (ALA) and jointly funded by NCES and the U.S. Department of Education's Library Programs (LP). The resulting report recommended expansion to all 50 states and the District of Columbia. A task force was formed with the goal of developing a comprehensive national system of data on the status of U.S. public libraries. The legislative mandate for collecting public library statistics was included in the Hawkins-Stafford Elementary and Secondary School Improvement Amendments of 1988 (PL 100-297). Section 406, subparts a-g mandated the development and support of a voluntary Federal-State Cooperative System (FSCS) for the annual nationwide collection and dissemination of public library data. This has since been superseded by the National Education Statistics Act of 1994 (PL 103-382) which mandates NCES to collect library statistics.

FSCS has become a working network, allowing for close communication with the states through State Data Coordinators, appointed by the Chief Officer of each State Library Agency (COSLA). Beginning in 1993 the following outlying areas joined FSCS: Guam, Northern Marianas, Palau, Puerto Rico, and the Virgin Islands. The states and outlying areas support the activities of FSCS at the state level. NCES provides the financial support for FSCS activities at the Federal level including sponsoring interagency agreements with U.S. Bureau of the Census, NCLIS, and other organizations for the work of FSCS. NCES works cooperatively with both agencies which have played a major role in the development of FSCS. NCES also works cooperatively with COSLA, ALA, Institute of Museum and Library Services, and PLLI, all of whom have made significant contributions. A Steering Committee that represents the State Data Coordinators and other public library constituents is active in the development of Public Libraries Survey data elements, data collection software design, table design, analysis, dissemination, and training.

In 1989 NCES developed a personal computer software package called DECTOP (Data Entry Conversion Table Output Program), for States to use in collecting individual public library data and generating statistical tables. In 1990 NCES developed PLUS (Public Library Universe System), another personal computer software package to collect data for the public library universe, including identifying information for individual public libraries and their outlets. In 1993 DECTOP and PLUS were merged into a revised software package called DECPLUS. The merger of DECTOP and PLUS into DECPLUS has saved time by eliminating duplication of effort and has improved data quality by minimizing duplicate data entry and enhancing edit checking. The FSCS Technical Subcommittee of the FSCS Steering Committee has incorporated state's recommendations for Public Libraries Survey software enhancements into DECPLUS, including developing more sophisticated data edits and help screens containing Public Libraries Survey data element definitions. The accompanying *DECPLUS User's Guide* has been made more clear and comprehensive. The Public Libraries Survey collects identifying information on all known public libraries and their service outlets, all library agencies, and some library systems, federations, and cooperative services. This resource is now available for use in drawing samples for special surveys on topics of interest about public libraries. A historical change tracking mechanism was established beginning with DECPLUS. Closings, additions, and mergers of public libraries and public library service outlets, for example, are tracked in a historical file as the user enters data.

In preparation for the submission of fiscal year 1995 data, a training conference, sponsored by NCES and arranged by NCLIS was held for the State Data Coordinators in March 1996 in Washington, D.C. The DECPLUS fiscal year 1995 software and manual were mailed to states in May 1996. The DECPLUS software and documentation were put on the Internet under Respondent Tools on the Governments Division, U.S. Bureau of the Census, Home Page. Responses were to be returned to NCES by July 31, 1996. Forty states, an increase of three over fiscal year 1994, received the Keppel award in recognition for submitting fiscal year 1995 data in a readable form by the July 31, 1996 closeout. NCES worked on nonresponse follow-up from November 1996 to March 1997. The FSCS Steering Committee assisted NCES with data review, and consulted with NCES on analysis, publication, and dissemination issues, and the annual training conference. In addition, FSCS has assigned each state a mentor from the FSCS Steering Committee, to supplement the technical assistance to states provided upon request, voluntarily by a number of State Data Coordinators and

by NCES staff and contractors. Technical assistance can range from a quick telephone inquiry to completing the data collection on-site.

The Public Libraries Survey is an example of the synergy that can result from combining federal and state cooperation with state-of-the-art technology. This survey was the first national NCES data collection in which the respondents supplied the information electronically and in which data also were edited and tabulated completely in machine-readable form. Opportunities for expanded electronic data collection from states are being tested in the Public Libraries Survey. For example, some data collection is being done via the Internet. Twelve states (Arizona, Hawaii, Kentucky, Michigan, New Hampshire, New York, Ohio, Oregon, Rhode Island, West Virginia, Wisconsin, and Wyoming) submitted fiscal year 1995 data electronically to the Census Internet site or as an attachment to an e-mail message. Beginning in 1996, with the 1994 data, NCES also implemented an early release policy for FSCS data. On a weekly basis data provided by states are provided over the Internet as received at NCES. This is preliminary data and subject to revision until replaced by a fully edited data file.

Today, these data provide the only current, national descriptive data on the status of nearly 9,000 public libraries. They are used by federal, state, and local officials, professional associations, and local practitioners for planning, evaluation, and policy making. These data are also available to researchers and educators for examining issues concerning the state of public libraries.

Plans for the Public Libraries Survey

NCES plans to continue the Public Libraries Survey as an annual survey. The fiscal year 1996 survey was mailed in August 1997, and had a due date of October 31, 1997. The data are scheduled for release in late Fall 1998.

The FSCS also has worked to improve adherence to NCES standards for data quality through the formation of a definitions subcommittee that is working on consistency of definitions among states. NCES has sponsored training enhancements at both state and local levels. In 1994, the FSCS Steering Committee formed a training subcommittee which continues to be responsive to the needs of the State Data Coordinators. For the last several years, data users have indicated interest in nonresponse imputation for the Public Libraries Survey data file. NCES and Census staff researched the best method(s) for imputing for item and institution nonresponse. The fiscal year 1995 file and E.D. TABS is the first release of an imputed Public Libraries Survey file. Imputation for fiscal year 1995 was based on final data from the 1990-1994 Public Libraries Survey files.

Several analytical projects are currently underway. NCES has sponsored a project through the American Institutes for Research that has developed indices of inflation for public libraries, a cost index, and a price index. A report of the project will be available in 1998. NCES has been exploring the potential of geographic mapping for public libraries. In September 1996 NCES sponsored a two-year project through Westat, Inc. to develop the capability to link census demographic data with Public Libraries Survey data through geographic mapping software.

Public library questions are also being included as parts of other NCES surveys. For example, in 1996 questions about frequency of use and the purposes for which households use public libraries were included on an expanded household screener for the NCES National Household Education Survey (NHES). Over 55,000 households nationwide were surveyed in such a way as to provide state- and national-level estimates on library items. The study was completed in 1996 with the data available as of July, 1997 on CD-ROM. FSCS also plans to include some library oriented questions on their new Early Childhood Longitudinal Survey. Questions are being field tested in 1997. Data collection is scheduled for 1998 and 1999, with data release scheduled for 2000.

NCES has also fostered the use and analysis of Public Libraries Survey data. A Data Use Subcommittee of the FSCS Steering Committee has been addressing the dissemination, use, and analysis of Public Libraries Survey data. Data dissemination has also been broadened with electronic release of current and back year data and E.D. TABS on Internet. In addition, an information service called the National Education Data Resource Center (NEDRC) has been set up. The NEDRC helps customers obtain reports and data files and also responds to requests for tabulations and limited analysis on the library and other NCES studies and surveys.

APPENDIX B

Glossary

Data item	Definitions
Administrative entity	This is the public library, state library agency, system, federation, or cooperative service that is legally established under local or state law to provide public library service to a particular client group (for example, the population of a local jurisdiction, the population of a state, or the public libraries located in a particular region). The Administrative Entity may be administrative only and have no outlets, it may have a single outlet, or it may have more than one outlet.
Administrative entity only	An Administrative Entity that does not serve the public directly and has no direct service outlets but may provide staff, materials, and services to other libraries; may receive and spend funds on behalf of other libraries; or may contract with other libraries to provide various library services. Examples are headquarters of systems, federations, or cooperative services.
Administrative entity with a single direct service outlet	An Administrative Entity that serves the public directly with one central library, books-by-mail only, or one bookmobile.
Administrative entity with multiple direct service outlets where administrative offices are separate	An Administrative Entity that serves the public directly with two or more service outlets, including some combination of central librar(ies), branch(es), bookmobile(s), and/or books-by-mail only. The administrative offices are separate from the direct service outlets and do not provide direct library services.
Administrative entity with multiple direct service outlets where administrative offices are not separate	An Administrative Entity that serves the public directly with two or more service outlets, including some combination of a central librar(ies), branch(es), bookmobile(s), and/or books-by-mail only.

Glossary -- Continued

Data item	Definitions
Administrative Structure	The Administrative Structure identifies an autonomous library entity that has its own governance and funding.
ALA-MLS	Librarians with master's degrees from programs of library and information studies accredited by the American Library Association. Note: Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE).
Association Libraries	An entity privately controlled but meeting the statutory definition of a public library in a given state: includes association libraries.
Audio	These are materials on which sounds (only) are stored (recorded) and that can be reproduced (played back) mechanically or electronically, or both. Included are records, audiocassettes, audio cartridges, audiodiscs, audioreels, talking books, and other sound recordings.
Book/serial volumes	Books are non-periodical printed publications bound in hard or soft covers, or in loose-leaf format. Serials are publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals (magazines), newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies. Except for the current volume, count unbound serials as a volume when the library has at least half of the issues in a publisher's volume.

Glossary -- Continued

Data item	Definitions
Bookmobile(s)	<p>A bookmobile is a traveling branch library. It consists of at least all of the following: 1) a truck or van that carries an organized collection of library materials; 2) paid staff; and 3) regularly scheduled hours (bookmobile stops) for being open to the public.</p> <p>Note: Count the number of vehicles in use, not the number of stops the vehicle makes.</p>
Books-by-mail only	<p>A direct mail order service which provides books and other library materials. Books-by-mail typically serves rural residents, the disabled, the homebound, and others without access to another type of public library outlet. Requests for materials are usually received by mail and by telephone only. Only books-by-mail services that are housed separately from any other type of direct public service outlet (that is, central library, branches, or bookmobiles) should be coded here.</p>
Branch library	<p>A branch library is an auxiliary unit of an Administrative Entity which has at least all of the following: 1) separate quarters; 2) an organized collection of library materials; 3) paid staff; and 4) regularly scheduled hours for being open to the public.</p>
Capital outlay	<p>These are funds for the acquisition of or additions to fixed assets such as building sites, new buildings and building additions, new equipment, initial book stock, furnishings for new or expanded buildings, and new vehicles. This excludes replacement and repair of existing furnishings and equipment, regular purchase of library materials, and investments for capital appreciation.</p> <p>Note: Local accounting practices shall determine whether a specific item is a capital expense or an operating expense regardless of the examples in the definition.</p>
Central city	<p>The largest central city and, in some cases, up to two additional central cities are included in the title of the Metropolitan Area; there also are central cities that are not included in a</p>

Glossary -- Continued

Data item	Definitions
	<p>Metropolitan Area title. A Metropolitan Area central city does not include any part of that city that extends outside the Metropolitan Area boundary.</p>
<p>Central library</p>	<p>This is one type of single outlet library or the library which is the operational center of a multiple-outlet library. Usually all processing is centralized here and the principal collections are housed here. Synonymous with main library.</p> <p>Note: Not all Administrative Entities have a central library and some Administrative Entities have more than one central library.</p>
<p>Children's program attendance</p>	<p>The count of the audience at all programs for which the primary audience is children. Includes adults who attend programs intended primarily for children.</p> <p>Note: <u>Output Measures for Public Library Service to Children: A Manual of Standardized Procedures</u> (ALA, 1992) defines children as persons age 14 and under.</p>
<p>Circulation of children's materials</p>	<p>The total annual circulation of all children's materials in all formats to all users. It includes renewals.</p>
<p>Collection expenditures</p>	<p>This includes all expenditures for materials purchased or leased for use by the public. It includes print materials, microforms, machine-readable materials, audiovisual materials, etc. It also includes operating expenditures for library materials in electronic format.</p>
<p>Combined libraries</p>	<p>In the Public Libraries Survey, the two types of combined libraries are:</p> <ul style="list-style-type: none"> o Combined Academic/Public Library: A library serving as both a college or university library and public

Glossary -- Continued

Data item	Definitions
	<p>library which is governed, funded, and operated by one or more legally constituted administrative jurisdictions.</p> <p>o Combined School Media Center/Public Library: A library serving as both a school media center and public library which is governed, funded, and operated by one or more legally constituted administrative jurisdictions.</p>
County/parish	<p>An organized local government authorized in a state's constitution and statutes and established to provide general government.</p>
Electronic format	<p>The physical units such as CD-ROMS, magnetic tapes and magnetic disks that are designed to be processed by a computer. Examples are U.S. Census data tapes, locally- mounted databases, reference tools, and serials on CD-ROM, tape, or floppy disk. Exclude bibliographic records used to manage the collection, library system software, and microcomputer software used only by the library staff.</p>
Electronic access	<p>These are electronic services provided either in the library or by remote access to the library (e.g., bibliographic and full-text databases, multi-media products). Include resources owned or leased by the library and access to remote databases and commercial services. Included are both direct patron access and staff access on behalf of patrons. Do not include Internet access.</p>
Employee benefits	<p>These are the benefits outside of salaries and wages paid and accruing to employees (including plant operations, security, and maintenance staff), regardless of whether the benefits or equivalent cash options are available to all employees. Include amounts spent by the reporting unit for direct, paid employee benefits including Social Security, retirement, medical insurance, life insurance, guaranteed disability income protection,</p>

Glossary -- Continued

Data item	Definitions
	<p>unemployment compensation, workmen's compensation, tuition, and housing benefits. Only that part of any employee benefits paid out of the public library budget should be reported.</p>
<p>Federal government operating income</p>	<p>This includes all federal government funds distributed to public libraries for expenditure by the public libraries, including federal money distributed by the state.</p>
<p>FSCS Public Library</p>	<p>See definition for Public Library (page 114).</p>
<p>Headquarters of a system, federation, or cooperative service</p>	<p>The library or entity that provides the physical space and staff who manage, coordinate, or administer the programs of the system, federation, or cooperative service.</p>
<p>Interlibrary loans provided to</p>	<p>These are library materials, or copies of the materials, provided by one library to another upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.</p>
<p>Interlibrary loans received from</p>	<p>These are library materials, or copies of the materials, received by one library from another library upon request. The libraries involved in interlibrary loans are not under the same library administration. These data are reported as annual figures.</p>
<p>Interlibrary relationship</p>	<p>The interlibrary relationship identifies an administrative entity's relationship to a system, federation, or cooperative service.</p>
<p>Internet access</p>	<p>The Internet is the collection of networks that connects</p>

Data item	Definitions
	<p>government, university, and commercial agencies (e.g., NSFNET, WestNet, etc.) and is unified by the use of a single protocol suite, TC/IP.</p> <p>Report the library as providing Internet access only if one or more of the following services are accessible: telnet, gopher, file transfer protocol, or community network. Do not report a library that has access to electronic mail only.</p>
Legal basis code	<p>The legal basis is the type of local government structure within which the entity functions.</p>
Librarians	<p>These are persons with the title of librarian who do paid work that usually requires professional training and skill in the theoretical or scientific aspects of library work, or both, as distinct from its mechanical or clerical aspect. This data element also includes ALA-MLS.</p>
Library district	<p>This is a district, authority, board or commission authorized by state law to provide library services.</p>
Library visits	<p>This is the total number of persons entering the library for whatever purpose during the year.</p> <p>Note: If an actual count of visits is unavailable, determine an annual estimate by counting visits during a typical week in - October and multiplying the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow.</p> <p>Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).</p>

Data item	Definitions
Local government operating income	<p>This includes all tax and non-tax receipts designated by the community, district, or region and available for expenditure by the public library. Do not include the value of any contributed or in-kind services or the value of any gifts and donations, fines, or fees.</p>
Member of a system, federation, or cooperative service, but not the headquarters	<p>An autonomous library joined by formal or informal agreement(s) with other autonomous libraries to perform various services cooperatively, such as resource sharing, communications, etc. This does include libraries that are part of multiple library systems, federations, or cooperative services. This does not include multiple outlet administrative entities (e.g., libraries with branches and that have the word "system" in their legal name) if the entity does not have an agreement with another autonomous library.</p> <p>Note: For the purposes of this classification, networks, such as OCLC and Internet are not considered systems, federations, or cooperative services.</p>
Metropolitan Area, but not within central city limits	<p>A large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some Metropolitan Areas are defined around two or more nuclei. Each Metropolitan Area must contain a place with a minimum population of 50,000 or a Census Bureau-defined urbanized area and a total Metropolitan Area population of at least 100,000 (75,000 in New England). A Metropolitan Area comprises one or more central counties. (Independent cities are considered county equivalents.) A Metropolitan Area may also include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character, such as population density, urban population, and population growth. In New England, Metropolitan Areas are composed of cities and towns rather than whole counties.</p>

Data item	Definitions
Multi-jurisdictional	An entity operated jointly by two or more units of local government under an intergovernmental agreement which creates a jointly appointed board or similar means of joint governance; to be distinguished from a library which contracts to serve other jurisdictions and from special library districts.
Municipal government (city, town or village)	A municipal government is an organized local government authorized in a state's constitution and statutes and established to provide general government for a specific concentration of population in a defined area.
Native American tribal government	An organized local government authorized and established to provide general government to residents of a Native American reservation. Note: Include native Alaskan villages in this category.
Non-profit association or agency	See Association libraries (page 104).
Official state total population estimate	This is the most recent official total population figure for your state that matches the local population figures that you are submitting to NCES. The State Data Coordinator should obtain this figure annually from the State Data Center or other official state sources.
Operating expenditures	Operating expenditures are the current and recurrent costs necessary to support the provision of library services.
Operating expenditures for electronic access	This is the operating expenditures from the library budget associated with access to electronic materials and services. Include computer hardware and software used to support library operations, whether purchased or leased, mainframe and microcomputer. Include expenditures for maintenance. Include expenditures for equipment

Data item	Definitions
	<p>used to run information service products when that expenditure can be separated from the price of the product. Report expenditures for services provided by national, regional, and local bibliographic utilities, networks, consortia and commercial services. Report all fees and usage costs associated with such services as OCLC FirstSearch or electronic document delivery.</p> <p>Note: Report only operating expenditures. These expenditures should also be included in Other Operating expenditures on the administrative entity screen. Do NOT report capital expenditures for items in this category.</p>
<p>Operating expenditures for materials in electronic format</p>	<p>This is the operating expenditures for materials considered part of the collection, whether purchased or leased, such as CD-ROMs, magnetic tapes, and magnetic discs, that are designed to be processed by a computer or similar machine. Examples are U.S. Census data tapes, locally-mounted databases, serials, and reference tools. Include operating expenditures for equipment when the cost is inseparably bundled into the price of the information service product. Exclude operating expenditures for library system software and microcomputer software used only by the library staff.</p> <p>Note: These expenditures should also be included in Collection Expenditures on the Administrative Entity screen.</p>
<p>Operating income</p>	<p>This includes income used for operating expenditures. Include federal, state, or other grants. Do not include income for major capital expenditures, contributions to endowments, income passed through to another agency (e.g., fines), or funds unspent in the previous fiscal year. Funds transferred from one public library to another public library should be reported by only one of the public libraries. The State Data Coordinator shall determine which library will report these funds.</p>
<p>Other operating expenditures</p>	<p>This includes all expenditures other than those for staff and collection. It also includes operating expenditures for</p>

Glossary -- Continued

Data item	Definitions
	<p>electronic access.</p> <p>Note: Include expenses such as binding, supplies, repair or replacement of existing furnishings and equipment, and costs incurred in the operation and maintenance of physical facilities.</p>
<p>Other operating income</p>	<p>This is all income other than that reported by local, state, and federal government. Include, for example, monetary gifts and donations received in the current year, interest, library fines, and fees for library services. Do not include the value of any contributed or in-kind services or the value of any nonmonetary gifts and donations.</p>
<p>Other paid staff</p>	<p>This includes all other FTE employees paid from the reporting unit budget, including plant operations, security, and maintenance staff.</p>
<p>Paid staff (full-time equivalent)</p>	<p>Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. To ensure comparable data, 40 hours per week has been set as the measure of full-time employment (FTE).</p>
<p>Population of the legal service area</p>	<p>The number of people in the geographic area for which a public library has been established to offer services and from which (or on behalf of which) the library derives income, plus any areas served under contract for which the library is the primary service provider.</p> <p>Note: The determination of this population figure shall be the responsibility of the state library agency. This population figure should be based on the most recent official state population figures for jurisdictions in your state available from the State Data Center. The State Data Coordinator should obtain these figures annually from the State Data Center or other official state sources. For administrative entities that do not serve the public</p>

Data item	Definitions
	<p>directly and have no outlets (e.g., a system, federation, or cooperative service), this number shall be zero.</p>
Public library	<p>A public library is an entity that is established under state enabling laws or regulations to serve a community, district, or region, and that provides at least the following:</p> <ol style="list-style-type: none"><li data-bbox="634 716 1424 779">1. An organized collection of printed or other library materials, or a combination thereof;<li data-bbox="634 821 1424 852">2. Paid staff;<li data-bbox="634 894 1424 957">3. An established schedule in which services of the staff are available to the public;<li data-bbox="634 999 1424 1062">4. The facilities necessary to support such a collection, staff, and schedule; and<li data-bbox="634 1104 1424 1136">5. Is supported in whole or in part with public funds.
Public service hours/year	<p>This is the sum of annual public service hours for outlets.</p> <p>Note: Include the hours open for public service for centrals, branches, bookmobiles, and books-by-mail only. For each bookmobile, count only the hours during which the bookmobile is open to the public. For Administrative Entities that offer ONLY books-by-mail service, count the hours that the outlet is staffed for service. Minor variations in scheduled public service hours need not be included, however extensive hours closed to the public due to natural disasters or other events should be excluded even if the staff is scheduled to work.</p>
Reference transactions	<p>A reference transaction is an information contact which involves the knowledge, use, recommendations, interpretation, or instruction in the use of one or more information sources by a member of the library staff. It includes information and referral services. Information sources include printed and non-printed materials,</p>

Data item	Definitions
	<p>machine-readable databases, catalogs and other holdings records, and, through communication or referral, other libraries and institutions and people inside and outside the library. The request may come in person, by phone, by fax, by mail, or by electronic-mail from an adult, a young adult, or a child.</p> <p>Do not count directional transactions or questions of rules or policies. Examples of directional transactions are "Where are the children's books?" and "I'm looking for a book with the call number 811.2G." An example of a question of rules or policies is "Are you open until 9:00 tonight?"</p> <p>Note: If an actual count of reference transactions is unavailable, determine an annual estimate by counting reference transactions during a typical week in October and multiply the count by 52. A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).</p>
<p>Reporting period ending date</p>	<p>This is the latest date (month and year) for a 12-month period that applies to the state's data being submitted to NCES.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the latest ending date.</p>
<p>Reporting period starting date</p>	<p>This is the earliest date (month and year) for a 12-month period that applies to the state's data being submitted to NCES.</p> <p>Note: Reporting period means data for the fiscal year that ended in the previous calendar year. If data are collected for different local reporting periods, provide the earliest starting date.</p>

Glossary -- Continued

Data item	Definitions
Salaries & wages expenditures	This includes salaries and wages for all library staff (including plant operations, security, and maintenance staff) for the fiscal year. Include salaries and wages before deductions but exclude employee benefits.
School district	An organized local entity providing public elementary, secondary, and/or higher education which, under state law, has sufficient administrative and fiscal autonomy to qualify as a separate government. Excludes "dependent public school systems" of county, municipal, township, or state governments.
Special library district (authority, board, commission)	See Library district (page 109).
Staff expenditures	This includes salaries and wages and employee benefits.
State government income	These are all funds distributed to public libraries by state government for expenditure by the public libraries, except for federal money distributed by the state. This includes funds from such sources as penal fines, license fees, and mineral rights.
State library agency	That agency within each of the states and territories which administers the Federal Library Services and Construction Act funds and which is authorized by a state to develop library services in the state. It may also provide direct services to the public.
Subscriptions	This refers to the arrangements by which, in return for a sum paid in advance, periodicals, newspapers, or other serials are provided for a specified number of issues.
	Note: Count subscriptions purchased from the library's budget and those donated to the library as gifts. Count titles, including

Glossary -- Continued

Data item	Definitions
	<p>duplicates, not individual issues. Include the total number of subscriptions for all outlets.</p>
<p>Total circulation</p>	<p>The total annual circulation of all library materials of all types, including renewals.</p> <p>Note: Count all materials in all formats that are charged out for use outside the library. Interlibrary loan transactions included are only items borrowed for users. Do not include items checked out to another library.</p>
<p>Total income</p>	<p>This includes income from the local government, the state government, the Federal government, and all other income.</p>
<p>Total operating expenditures</p>	<p>This includes total expenditures on staff, total expenditures on collection, and other operating expenditures.</p>
<p>Total paid employees</p>	<p>This is the sum of total librarians and all other paid staff.</p>
<p>Total unduplicated population of legal service areas</p>	<p>This is the total unduplicated population of those areas in your state that receive library services. The population of unserved areas is not included in this figure.</p> <p>Note: A state's actual total population of legal service areas may be different from the total population of legal service areas as calculated by DECPLUS. This happens in states where there are overlaps in population of legal service areas served by individual libraries, resulting in the same population being counted twice in the DECPLUS calculation. For states that have no overlapping jurisdictions, this number will be identical to your state's total population of legal service areas as calculated by DECPLUS. For states which do have overlaps in population of legal service areas served by individual libraries, this number must be calculated separately.</p>

Notes: 1. Per capita calculations are based on population of legal service area.

2. The District of Columbia, while not a state, is included in the state rankings. Special care should be used in making comparison.

3. Total staff expenditures include expenditures for salaries and wages and employee benefits. State rankings of employee benefits expenditures are not included in this report.
